> SCHOOL OF PUBLIC HEALTH AND HEALTH SERVICES

Report on ACA impact on health centers and patients

- Purpose: to develop national and state-by-state estimates of the number of uninsured and potentially eligible CHC patients, as well as impact on CHC revenues from decision to expand or opt out
- Estimates based on:
 - data from the 2009 HRSA Survey of CHC patients and 2011 Uniform Data System
 - Urban Institute's estimated share of uninsured residents who are expected to gain coverage in optout and opt-in states

Source: Buettgens, M., Kenney, G.M., Recht, H., & Lynch, V. (2013). *Eligibility for Assistance and Projected Changes in Coverage Under the ACA: Variation Across States*. Robert Wood Johnson Foundation. Available at: http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2013/rwjf408158

Over half of uninsured CHC patients are poor, and 70% are at \leq 138% FPL

Income range	Distribution of uninsured CHC patients (2009), by income	Estimated number of uninsured health center patients (2011)*	
≤100% FPL	53%	3,903,005	
101-200% FPL	31%	2,282,890	
201-400% FPL	13%	957,341	
>400% FPL	3%	220,925	
≤ I38% FPL	70%	5,154,913	
139-400% FPL	27%	1,988,323	
≤400% FPL	97%	7,143,236	

*Calculated by multiplying 2nd column percentages by the 7,364,161 uninsured reported in the 2011 UDS Sources: 2009 CHC User Survey, HRSA and the 2011 UDS, HRSA

Estimates of CHC patients eligible for coverage

- Based on UDS data and Urban Institute (more conservative):
 - Approximately 2 in 3 CHC patients (5 million nationwide) would be eligible were all states to expand Medicaid
 - But an estimated I million patients will remain ineligible in states that opt-out
 - Approximately 72% of this group lives in 11 southern states (AL, FL, GA, LA, MS, NC, OK, SC, TN,TX,VA)

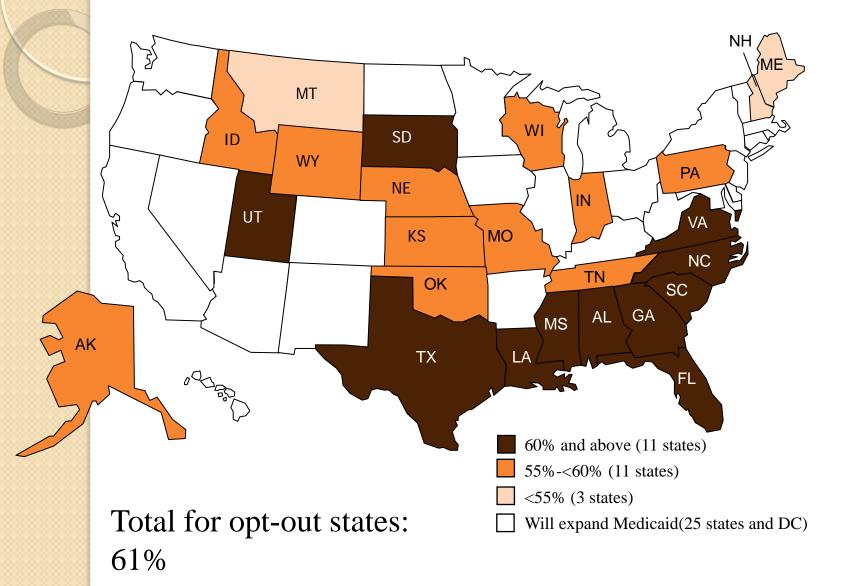

Opt-out state findings

- 518 CHCs in the 25 non-expansion states serve ~3.1 million uninsured patients
 - I.2 million CHC patients in opt-out states would be eligible for traditional Medicaid or subsidized coverage
 - Had states expanded, an additional 1 million would have been eligible
- Approximately \$555 million in revenue foregone in 2014 in opt-out states

Estimated Impact on Uninsured Patients and Health Center Revenues in States that Opt Out of Medicaid

State	Number of CHCs (2011)	Total CHC patients (2011)	Uninsured CHC patients (2011)	Uninsured eligible with Medicaid expansion	Uninsured eligible without Medicaid expansion	Potential revenue gained in 2014 under Medicaid expansion	Potential revenue gained in 2014 without Medicaid expansion
Alabama	14	320,044	152,414	121,931	57,917	\$55,006,620	\$26,128,144
Alaska	25	91,020	32,216	24,162	13,853	\$29,452,818	\$16,886,283
Florida	44	1,080,695	504,432	343,014	186,640	\$188,666,714	\$102,656,888

Wisconsin	16	281,591	67,793	51,523	29,151	\$42,776,643	\$24,202,574
Wyoming	5	18,022	7,512	5,334	3,305	\$2,421,402	\$1,500,587
Total	518	7,349,965	3,073,939	2,207,782	1,185,514	\$1,211,378,495	\$656,486,033

Between 47% and 66% of all uninsured CHC patients in optout states will remain uninsured

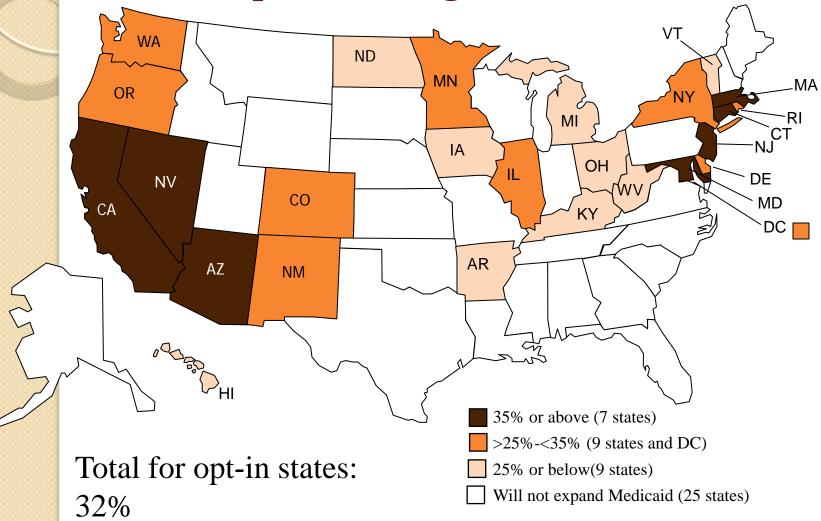

Medicaid expansion states

- 582 CHCs in the 25 expansion states plus
 D.C. currently serve ~ 4.2 million uninsured
- approximately 2.8 million patients will be eligible for coverage and will generate potential revenues of > \$2 billion
- Had states not expanded, ~1.2 million uninsured patients would have remained ineligible for Medicaid and CHCs would have foregone nearly \$900 million in Medicaid revenue in 2014

Estimated Impact on Patients and Health Center Revenues in States that Implement the ACA Medicaid Expansion

State	Number of CHCs (2011)	Total CHC patients (2011)	Uninsured CHC patients (2011)	Uninsured eligible with Medicaid expansion	Uninsured eligible without Medicaid expansion	Potential revenue gained in 2014 with Medicaid expansion	Potential revenue gained in 2014 without Medicaid expansion

In opt-in states, the percentage of uninsured CHC patients who will remain uninsured even with expansion ranges from 19%-41%

Discussion

- Added revenues realized from the coverage expansions will enable health centers to expand into new communities, increase the number of patients served, add needed services such as adult dental and mental health care, and increase clinical staffing levels
- In the opt-out states, few will be able to qualify under traditional Medicaid eligibility rules since most presumably would have been identified by CHCs as eligible and enrolled before health reform.
- Health centers in non-expansion states can be expected to confront more significant growth challenges, more limited service capacity, and more limited ability to invest in the types of system reforms that improve quality and efficiency
- Health centers in opt-in states will continue to serve as critical source of care for uninsured.

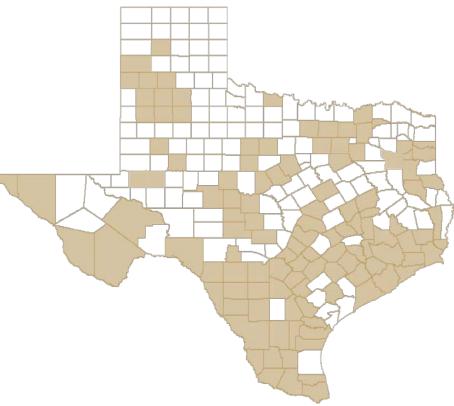

A Deeper Look at An Opt-Out State

Texas Health Centers

2012 Quick Facts

- 1,091,741 patients served
- 4,133,700 total patient visits
- 70 FQHCs, including 2 FQHC Look-Alikes
- Located in 118 counties across Texas
- 350 service delivery sites
- 73% of patients are at or below 100% FPL
- 51% of patients are uninsured
- Average annual cost per patient for medical, dental, behavioral services - \$471

2013 Health Center Locations

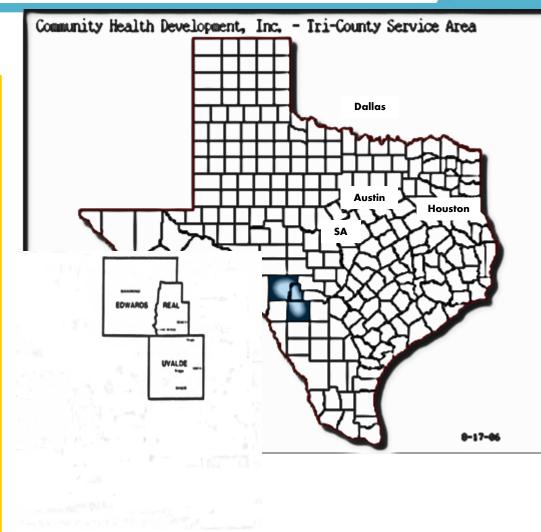

Community Health Development, Inc. (Uvalde, Texas)

2012 Quick Facts

- 11,521 patients served
- 34,409 total patient visits
- 5 service delivery sites
- 76% of patients are at or below 150%
 FPL
- 70% of patients are uninsured
- Average annual cost per patient for

medical & dental - \$530.23
